

INDUCTION (ELECTRIC) MOTOR

It is multi purpose motor.

Suitable for

- Commercial Wet Grinders.
- Water Compressors.
- Machinery and Industrial Applications.
- Rice Mills and any other rotational purpose.

Features

- Maintenance free.
- Low noise.
- High operating efficiency.
- Rigid construction.
- Anti - corrosive coating on the CI parts.
- Free from rust and corrosion.
- General Installation Arrangement.
- Power saving.
- Easy Installation and Silent, Vibration – Free running.
- Less consumption of electrical power.

Technical Data

- | | | |
|-----------------------|---|---------------|
| • Class of Insulation | : | “ B ” |
| • Type | : | CS / CR |
| • Motor | : | 50 Hz |
| • Phase | : | Single |
| • Volt | : | 200 / 220V |
| • Shaft | : | EN8 |
| • Speed | : | 1420 RPM |
| • Motor Body | : | CI |
| • Motor | : | Squirrel Cage |
| • Totally enclosed | | |
